[Cleco Corporation - BART Discussions.pdf](#)

Lets see if we can have a draft response by Monday noon for my signature.

Jennifer please take the lead on the overall letter.

Erik please take the lead on responses to question 1-4.

Assuming the answer to question 4 is they can go ahead and skip to refined modeling, I think the answer to question 5 is just we appreciate their concern about the deadline, we hope that by moving directly to refined modeling they will be able to meet the deadline.

For question 6, I think we should have a conversation with them regarding specifics of their situation and invite them to work with Jennifer to set something up.

Ellen, I would appreciate your thoughts on question 7.

Thanks all.

Comments, Questions and Requests

Dear Mr. Donaldson,

Please see the attached memo which contains comments, questions and requests regarding the information provided during the most recent May 18th 2015

BART stakeholders' conference call and in the subsequent 114(a) information request letter received by Cleco.

We look forward to your response.

Sincerely,

Bill Matthews
